Résumé

During 19 years of clinical practice, I had the privilege as a physician to learn a lot from my patients. I firmly believe that if we could collect medical information in such a way that we not only understand the patient with his disease but also his comorbidities and his resources, we maximize our chances to make an impact. Our talent is to empower the patient to be engaged in his treatment and to provide the best possible cure and care.

Areas of expertise

- Senior physician Endocrinology and Diabetology
- Senior physician internal medicine
- Mentor and teacher
- Presenting skills (including group courses for patients)
- Social skills, especially adaptability to maximize learning
- Reviewer for endocrinology publications
